NearPoint Data Export and Migration Services

Safely migrate NearPoint or Mimosa email archive databases to PST format through Sonasoft's Data Migration and Data Export Services:

- ❖ **FAST**: Extract up to and over 1 Tb of data per day
- ❖ **SAFE**: Data integrity reports with verification
- ❖ **FLEXIBLE**: Range of extraction options
- ❖ **AFFORDABLE**: Best price for quality service

Two-Step Migration Process: 1) Verification then 2) Export/Migration

Sonasoft's Email Data Migration Services provide a two-step process to ensure data integrity with zero corruption. First, Sonasoft's Migration Services verifies the integrity of the NearPoint and Mimosa Database. This allows for corrections of any corrupt messages prior to the migration process.

After the NearPoint or Mimosa archived database has been verified and corrected, then Sonasoft's Migration Services speedily migrate the email archive into PST format, the industry standard. Sonasoft's Migration Reports will check and verify the integrity of the newly migrated PST files. In the rare instance of any errors, a specific range of the migration can be run again to ensure the migrated data is complete.

Sonasoft's powerful migration features allow flexibility in which data gets archived, e.g. by specific user(s), date range, etc. Sonasoft's NearPoint/Mimosa Data Migration Services also can extract email and files in Public Folders as well as other data formats that has have been archived in NearPoint and Mimosa.

Exclusive Feature!
Get peace of mind with Sonasoft's Data Integrity and Verification Tools.
No other data migration service has these features.

Sonasoft®
Email Archiving Done Right

FEATURE	NEARPOINT	SONASOFT
Database verification & data integrity tools	✗	✓
Extract user archived email data that is still in the Exchange Server	✓	✓
Extract user archived email that was deleted from Exchange	✗	✓
Extract email data that was ingested into NearPoint via a PST file	✗	✓
Extract PST email data that end users archived into NearPoint	✗	✓
Extract Public Folders data	✗	✓
Extract email based on data range	✗	✓
Reports with number of messages and corrupt messages	✗	✓
Reports for message migrated and message that fail migration	✗	✓
Migration Extraction Performance up to and over 1 Tb day	✗	✓
Average Time to Complete Migration of 1.5 Tb	Several weeks / over a month	One or two days

Please note: extraction performance greatly will depend on the customer's NearPoint or Mimosa environment as well as the type of data that has been archived. Regardless, Sonasoft's Migration Services will complete in days rather than in weeks or months it would take by using the standard extraction feature in NearPoint.

Large Migrations Welcomed
For large migrations, e.g. greater than 20 Tb, Sonasoft's Data Migration Services offer the option to include high performance hardware to complete the migration faster. Please contact your Sonasoft sales team for a quote.

Price Match Guarantee
Sonasoft will match or beat any verified quote from a reputed vendor. To obtain a no-cost estimate and migration consultation, please contact us. We value your business.
